

GCS Brand Kit & Logo Kit

Built from the supplied master logo PDF for Grupo Integral De Construcciones y Servicios.

This is a practical starter brand system derived directly from the provided artwork. It preserves the existing mark, defines a usable color palette, and packages production-ready logo files for daily use across proposals, social media, invoices, signage mockups, and presentations.

Core palette

Swatch	Name	Hex	Suggested use
	Brand Blue	#003571	Primary background, headers, cover fields, uniforms, digital banners
	GCS Gold	#F5CE49	Main GCS lettering and premium emphasis
	Accent Gold	#F8C94B	Chevron accent, highlights, calls to action
	Light Gray	#E5E5E5	Secondary arrow, neutral dividers, layout balance
	White	#FFFFFF	Reverse logo, text on dark surfaces, spacing and contrast

Logo system

Primary lockup: Use the full-color logo on the blue field whenever you have full control of the background.

Light-background version: Use the transparent full-color logo on white or very light neutral surfaces.

Reverse version: Use the all-white logo on photography, navy, dark gray, or construction-site imagery.

Icon: Use the chevron symbol alone for avatars, favicons, badges, app tiles, watermarks, and social profile images.

On light backgrounds	Reverse / dark backgrounds	Icon

Usage guidance

Preferred background: Brand Blue is the signature field and gives the mark its strongest presence.

Minimum clear space: Keep at least the height of the small subtitle letters around the full logo on all sides.

Minimum size: Avoid using the full lockup below 32 mm wide in print or 220 px wide on screen.

Use the icon instead at smaller sizes.

Do not: stretch the logo, rotate it, change the chevron direction, add outlines, place it over busy textures without contrast, or swap the gold for unrelated yellows/oranges.

Recommended supporting typography

The supplied logo file does not identify an official brand type family. For everyday documents and marketing layouts, a geometric sans-serif style matches the character of the existing mark well.

Recommended working substitutes:

Headlines: Montserrat Bold or SemiBold

Body text: Montserrat Medium / Regular, Inter, or Source Sans 3

Documents: Aptos or Calibri can be used in Microsoft Office when brand fonts are unavailable

Production package included

The logo kit includes SVG and PNG exports for the full logo, reverse logo, and icon mark, plus a square social avatar. SVG files are the preferred source for print, signage, vehicle graphics, embroidery approvals, and large-format vendors. PNG files are ready for office documents, websites, and messaging apps.

Derived from supplied artwork; colors are sampled directly from the source file.
